EXCELLENCE IN ACOUSTIC ROOF SOLUTIONS

- Acoustic roof systems that absorb up to 90% of internal reverberated sound.
- Range of different roof sheets to suit the design brief.
- Perforated liner sheet with a range of perforation patterns & aperture sizes.
- Acoustic resin bonded slabs with tissue facing can be laid in the trough of the liner sheet or across the top of the crown.
- 'Built-up' roof systems provide a weighted sound reduction of 40dB from outside sound.

GUARANTEED TO SAVE YOU MONEY!
